			Additional Donation	
			GRAND TOTAL	

**Important Information:**

- Tree seedlings are ordered from a quality nursery. Neither the nursery nor the Nature Center can guarantee or warranty the survival rate of any plant due to variables outside our control.
- Orders could be cancelled by a situation beyond our control. If this occurs, a refund will be given.
- All orders are subject to availability.
- All individual tree varieties are sold in multiples of 10 only.
- Orders not picked up on May 1<sup>st</sup> will be considered a donation and no refund given.
- Payment must accompany order and checks made payable to: 1000 Islands Environmental Center

## 1000 ISLANDS ENVIRONMENTAL CENTER 2021 TREE SEEDLING SALE

1000 Islands Environmental Center is holding a tree seedling sale to offer landowners and homeowners the opportunity to improve and protect the environment while beautifying and increasing the value of their property. Proceeds of the sale are used to fund educational programs conducted by the Nature Center staff. All tree seedlings are bare root. 1000 Islands Environmental Center makes every effort to ensure tree seedling health, but we cannot offer any guarantees.

**Eastern White Pine (*Pinus strobes*):** Soft bluish-green needles, 3 to 5 inches. Grows well in most average to moist soils. Excellent ornamental if sheared lightly. Also good windbreak and timber species. Can grow more than 100' in height. *10 seedlings per bundle.*

**Red Maple (*Acer rubrum*):** The Red Maple provides you with red color year round. This tree is very adaptable to most soil types and moisture conditions. Showy red flowers appear in spring, reddish twigs and buds display in winter and even the stems on the green leaves are red in summer. The autumn color makes this one of the most popular maple trees. Brilliant ruby red, orange and yellow leaves with red stems adorn the Red Maple tree as temps cool off and days shorten. This is the tree that made fall famous. *10 seedlings per bundle*

**Sugar Maple (*Acer saccharum*):** One of the best large shade trees. Slow to medium growth rate, 75' to 100' in height. May have orange or red fall color. Yellow flowers. Prefers well-drained, moderately moist, fertile soil. Although shade tolerant, full sun needed for proper development. *10 seedlings per bundle*

**White Oak (*Quercus alba*):** Rounded, broad-rounded or upright rounded when mature. Height: 60' to 80' tall. One of the most attractive oaks. Slow-growing. Small, elongated acorns. Prefer full sun, acidic soil. Showy, purple-red long lasting foliage. *10 seedlings per bundle*

**Swamp White Oak (*Quercus bicolor*):** As the name suggests, this oak is found growing wild in low-lying and swampy areas – often moist bottomlands or river banks. But it grows just as well in an urban or suburban setting, with tolerance to compacted soil and (perhaps surprisingly) drought. The swamp white oak is a great choice for a shade or street tree, with the ability to grow at a moderate pace and live more than 300 years. It's the kind of tree you plant for not only your enjoyment but for the benefit of generations to come. *10 seedlings per bundle*

**Shagbark Hickory (*Carya ovata*):** The shagbark hickory is an excellent shade tree that gives a stunning display of gold leaves in autumn. It is a slow growing species that may reach a height of 60' to 80'. This hickory is best known for its distinctive gray-brown shaggy bark which adds an element of winter interest. An upright tree, it becomes more round topped as it matures. This tree produces large, edible nuts that are touted for their sweet flavor and hickory scent. *10 seedlings per bundle*
